The Transaction contemplates the demerger of Gas Business Undertaking from AEL and transfer to AGL pursuant to the Proposed Scheme. The Proposed Scheme will include the following steps:

Step 1: Amalgamation of AGHL with AGL

Under Step 1, AGHL which is parent company of AGL will be amalgamated with AGL. As consideration for the amalgamation of AGHL into AGL, AGL shall issue shares to shareholders of AGHL. As a result of this, the resultant shareholding of AGL will be as follows:

Resultant shareholding of AGL	No of Shares^A	% shareholding
Equity share capital		
Adani Enterprises Limited along with its nominees	233,600,000	100.00%
Total	233,600,000	100.00%
Preference share capital		
Mahaguj Power LLP along with its nominees	25,500	51.00%

Step 2: Transfer and vesting of Gas Business Undertaking from AEL into AGL.

Under Step 2, Gas Business Undertaking, as defined above, will be demerged from AEL and will be transferred to AGL. As a part of the Proposed Scheme, the face value per equity share of AGL shall be sub-divided from INR 10 to INR 1.

As a consideration, equity shares of AGL will be issued and allotted to the equity shareholders of AEL.

BASIS OF EQUITY SHARE ENTITLEMENT RATIO

As set out above,

- As on 31 December 2017, the issued, subscribed and paid up capital of AEL consists of 1,099,810,083 fully paid up equity shares of face value INR 1 each.
- AGL is indirectly a wholly owned subsidiary of AEL.

We understand that in consideration of the demerger of the Gas Business Undertaking, AGL proposes to issue 1 equity share of face value INR 1 each of AGL for every 1 equity share of face value INR 1 each held in AEL, being the consideration of the transfer and vesting of the Gas Business Undertaking.

In case any shareholder's equity holding in AEL is such that such shareholder becomes entitled to a fraction of an equity share of AGL, the same will be treated as per relevant provisions of the Proposed Scheme.

Based on the aforementioned and that upon demerger, the set of shareholders and holding proportion being proposed for AGL is identical to that of AEL, the beneficial economic interest of the equity shareholders of AEL in AGL will remain same at the time of the Proposed Transaction.

We believe that the above share entitlement ratio is fair and reasonable considering that all the shareholders of AEL are and will, upon demerger, be the ultimate economic beneficial owners of AGL and in the same ratio (inter se) as they hold shares in AEL, as on the record date to be decided by Management of AEL in the Proposed Scheme.

Our Report and share entitlement ratio is based on the envisaged equity share capital structure of AEL, AGHL and AGL as mentioned earlier in this Report. Any variation in the equity capital structures of AEL, AGHL and AGL apart from the above mentioned Proposed Scheme may have material impact on the share entitlement ratio.

The Special Resolution confirming this alteration was passed under section 13(1) of the Companies Act by the members of the Company on 25th March, 2017.

NOTE : 2 Summary of Significant Accounting Policies

a) Basis of Preparation and Presentation of Financial Statements

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time.

These Financial statements have been prepared and presented under the historical cost convention with the exception of certain assets and liabilities that are required to be carried at fair values by Ind AS. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between the market participants at the measurement date.

The financial statements are presented in INR except when otherwise stated.

b) Use of Estimates and Judgements

The preparation of financial statements in conformity with Ind AS requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and differences between the actual results and the estimates are recognised in the periods in which the results are known / materialized.

c) Current & Non-Current Classification

Any asset or liability is classified as current if it satisfies any of the following conditions:

- i) The asset/liability is expected to be realized/settled in the Company's normal operating cycle;
 - ii) The asset is intended for sale or consumption;
 - iii) The asset/liability is held primarily for the purpose of trading;
 - iv) The asset/liability is expected to be realized/settled within twelve months after the reporting period;
 - v) The asset is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date;
 - vi) In the case of a liability, the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.
- All other assets and liabilities are classified as non-current.

For the purpose of current/non-current classification of assets and liabilities, the Company has ascertained its normal operating cycle as twelve months. This is based on the nature of services and the time between the acquisition of assets or inventories for processing and their realization in cash and cash equivalents.

d) Cash And Cash Equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in

e) Investment in Subsidiary

Investment in Subsidiary is measured at cost less impairment in accordance with Ind AS 27 "Separate Financial Statements".

ADANI GAS HOLDINGS LIMITED
(Formerly known as MUNDRA LNG LIMITED)

Notes to financial statements for the year ended 31st March, 2018

f) Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

g) Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured regardless of when the payment is made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

The specific recognition criteria described below must also be met before revenue is recognised.

Sale of Goods

Revenue from sale of goods is recognised when ownership in the goods is transferred to the buyer for a price, when significant risks and rewards of ownership have been transferred to the buyer and no effective control, to a degree usually associated with ownership, is retained by the Company.

Interest Income

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

h) Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

For purposes of subsequent measurement, financial assets and liabilities are classified in various categories as under.

- > at amortised cost
- > Fair value through other comprehensive income
- > Fair value through profit and loss account

Financial instruments are subsequently measured and accounted based on their category. All financial instruments of the Company are covered under Amortised Cost. After initial measurement, such financial assets and liabilities are subsequently measured using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Derecognition of Financial Assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement

Impairment of Financial Assets

The Company applies simplified approach model for measurement and recognition of impairment loss on the financial assets and credit risk exposure.

Under the simplified approach the Company does not track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime expected credit losses (ECL) at each reporting date, right from its initial recognition.

Derecognition of Financial Liability

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

ADANI GAS HOLDINGS LIMITED
(Formerly known as MUNDRA LNG LIMITED)

Notes to financial statements for the year ended 31st March, 2018

i) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

j) Earnings Per Share

The Basic EPS has been computed by dividing the income available to equity shareholders by the weighted average number of equity shares outstanding during the accounting year. The Diluted EPS has been computed using the weighted average number of equity shares and dilutive potential equity shares outstanding at the end of the year.

k) Taxes on Income

Tax expense comprises of current income tax and deferred tax.

i) Current Taxation

In the absence of any taxable income, provision for taxation has not been made in accordance with the income tax laws prevailing for the relevant assessment year.

ii) Deferred Taxation

Deferred tax is provided using the balance sheet approach on temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements at the reporting date. Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity).

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses to the extent it is probable that these assets can be realised in future.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax assets and liabilities are offset where a legally enforceable right exists to offset current tax assets and liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred tax includes MAT tax credit. The Company reviews such tax credit asset at each reporting date to assess its recoverability.

l) Provisions, Contingent Liabilities and Contingent Assets

Provisions involving substantial degree of estimation in measurement are recognised when there is a present obligation as a result of past events and it is possible that there will be an outflow of resources. Contingent liabilities are not recognised but are disclosed in the notes. Contingent assets are not recognised in the financial statements. The nature of such assets and an estimate of its financial effect are disclosed in notes to the Financial Statements.

Notes to financial statements for the year ended 31st March 2018

Note : 20 Financial Instruments and Risk Review

(a) Accounting Classification and Fair Value Hierarchy

Financial Assets and Liabilities :

The Company's principal financial assets include loans and trade receivables, cash and cash equivalents, investments and other receivables. The Company's principal financial liabilities comprise of borrowings, provisions, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations and projects.

Fair Value Hierarchy :

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Level-1 : Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level-2 : Inputs are other than quoted prices included within Level-1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level-3 : Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on the assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

The following tables summarises carrying amounts of financial instruments by their categories and their levels in fair value hierarchy for each year end presented.

ADANI GAS HOLDINGS LIMITED
(Formerly known as MUNDRA LNG LIMITED)

Notes to financial statements for the year ended 31st March 2018

(i) Interest Risk :

The Company is exposed to changes in interest rates due to its financing, investing and cash management activities. The risks arising from interest rate movements arise from borrowings with variable interest rates. The Group manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. Since the company has raised funds with fixed rates of interest, its exposure to interest risk is insignificant.

(ii) Credit Risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a loss to the company. The company has adopted the policy of only dealing with creditworthy counter parties as a means of mitigating the risk of financial losses from default. The carrying amount of financial assets recorded in the financial statements represents the company's maximum exposure to credit risk. Cash are held with creditworthy financial institutions.

(iii) Liquidity Risk

The Company monitors its risk of shortage of funds using cash flow forecasting models. These models consider the maturity of its financial investments, committed funding and projected cash flows from operations. The Company's objective is to provide financial resources to meet its business objectives in a timely, cost effective and reliable manner and to manage its capital structure. A balance between continuity of funding and flexibility is maintained through the use of various types of borrowings.

The tables below provide details regarding contractual maturities of significant liabilities as at the end of each year end presented.

The company is presently operating in Ahmedabad, Vadodara, Faridabad and Kharja.

NOTE : 2 SIGNIFICANT ACCOUNTING POLICIES ADOPTED BY THE COMPANY IN THE PREPARATION & PRESENTATION OF THE ACCOUNTS :

a) STATEMENT OF COMPLIANCE

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time by the Companies (Indian Accounting Standards) (Amendment) Rules, 2016.

b) BASIS OF PREPARATION OF FINANCIAL STATEMENTS

These financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between the market participants at the measurement date.

The Financial statements are presented in INR except when otherwise stated.

c) USE OF ESTIMATES

The preparation of financial statements in conformity with Ind AS requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and differences between the actual results and the estimates are recognised in the periods in which the results are known / materialised.

Estimates and assumptions are required in particular for:

i) Useful life of tangible assets:

Determination of the estimated useful life of tangible assets and the assessment as to which components of the cost may be capitalised. Useful life of tangible assets is based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful life is different from that prescribed in Schedule II, it is based on technical advice, taking into account the nature of the asset, estimated usage and operating conditions of the asset, past history of replacement and maintenance support. Assumptions also need to be made, when the Company assesses, whether an asset may be capitalised and which components of the cost of the asset may be capitalised.

ii) Recognition of deferred tax

Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies including estimates of temporary differences resulting on account of available benefits from Income Tax Act, 1961. Deferred tax assets recognized to the extent of the corresponding deferred tax liability.

iii) Fair value measurement of financial instruments

In estimating the fair value of financial assets and financial liabilities, the Company uses market observable data to the extent available. Where such Level 1 inputs are not available, the Company establishes appropriate valuation techniques and inputs to the model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in note 38.

iv) Recognition and measurement of other provisions:

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the balance sheet date. The actual outflow of resources at a future date may therefore vary from the figure included in other provisions.

v) Defined benefit plans

The obligation arising from the defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and life expectancy.

ADANI GAS LIMITED

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31-Mar-2016

d) CURRENT & NON-CURRENT CLASSIFICATION

All the assets and liabilities have been classified as current or non-current as per the company's normal operating cycle and other criteria set out in Schedule III to the Companies Act, 2013. Based on the nature of activities and time between the activities performed and their subsequent realisation in cash or cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current / non-current classification of assets and liabilities.

e) INVENTORIES

i) Inventories are valued at lower of cost or net realisable value.

ii) Stores and Spares are valued at Cost or NRV which ever is less. Cost is determined on Weighted Average basis & comprises of expenditure incurred in the normal course of business in bringing inventories to their location & condition including appropriate overheads.

iii) Quantity of CNG in cascades and Natural Gas in pipelines are estimated on a volumetric basis & are valued on Weighted Average basis considering lower of cost or net realisable value.

iv) Net Realisable value is the estimated selling price in the ordinary course of business, less estimated cost of completion and estimated cost necessary to make the sale.

f) CASH AND CASH EQUIVALENTS (FOR PURPOSES OF CASHFLOW STATEMENTS)

Cash comprises cash on hand and demand deposit with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

g) CASH FLOW STATEMENT

Cash flows are reported using indirect method, whereby profit/ (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the company are segregated based on the available information.

h) REVENUE RECOGNITION

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment.

- Based on the Educational Material on Ind AS 18 issued by the ICAI, the Company has assumed that recovery of excise duty flows to the Company on its own account. This is for the reason that it is a liability of the manufacturer which forms part of the cost of production, irrespective of whether the goods are sold or not. Since the recovery of excise duty flows to the Company on its own account, revenue includes excise duty.

- However, sales tax/ value added tax (VAT) is not received by the company on its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

i) Revenue on sale of natural gas is recognized on transfer of title to customers at delivery point. Sales are billed bi-monthly for domestic customers, fortnightly for commercial, Non commercial & Industrial Customer.

ii) Revenue on sale of Compressed Natural Gas (CNG) is recognized on sale of gas to customers from CNG stations.

iii) Gas Transportation Income is recognized in the same period in which the related volumes of gas are delivered to the customers.

iv) Interest revenues are recognised on time proportion basis taking into account the amount outstanding and the rate applicable.

v) Gas supplied to domestic customers for which billing have not been done as per the billing cycle is treated as stock and revenue for the same is accounted in the year in which Sales are billed.

vi) Dividend income from investments is recognised when the Company's right to receive payment is established.

i) PROPERTY, PLANT & EQUIPMENTS

i) Property, Plant and Equipment's, including Capital Work in Progress, are stated at cost of acquisition or construction less accumulated depreciation and impairment losses & net of Taxes (net of Cenvat and VAT credit wherever applicable).

ii) All direct cost attributable to respective assets are capitalized to the assets. Other indirect expenses are capitalized to assets in proportion of the value of the assets. Borrowing cost relating to acquisition / construction of Property, Plant and Equipment which take substantial period of time to get ready for its intended use are also included to the extent they relate to the period till such assets are ready to be put to use.

iii) Subsequent expenditure related to an item of Property, Plant and Equipment is added to its book value only if it increases the future economic benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing Property, Plant and Equipment's, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the profit and loss for the period during which such expenses are incurred.

k) FINANCIAL INSTRUMENTS

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in Statement of Profit and Loss.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Company entity are recognised at the proceeds received, net of direct issue costs.

A) Financial Assets

All financial assets, except investment in subsidiaries, associates and joint ventures are recognised initially at fair value.

The measurement of financial assets depends on their classification, as described below:

ADANI GAS LIMITED

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31-Mar-2018

1) At amortised cost

A financial asset is measured at the amortised cost if both the following conditions are met :

- (a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- (b) Contractual terms of the asset give rise, on specified dates, to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss. This category generally applies to trade and other receivables.

2) At Fair Value through Other Comprehensive Income (FVTOCI)

A financial asset is classified as at the FVTOCI if both of the following criteria are met:

- (a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- (b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognised in the other comprehensive income (OCI) and on derecognition, cumulative gain or loss previously recognised in OCI is reclassified to Statement of Profit and Loss. For equity instruments, the Company may make an irrevocable election to present subsequent changes in the fair value in OCI. If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to Statement of Profit and Loss, even on sale of investment.

3) At Fair Value through Profit & Loss (FVTPL)

FVTPL is a residual category for debt instruments and default category for equity instruments. Financial assets included within the FVTPL category are measured at fair value with all changes recognised in the Statement of Profit and Loss.

In addition, the Company may elect to designate a debt instrument, which otherwise meets amortised cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Derecognition

On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in Statement of Profit and Loss if such gain or loss would have otherwise been recognised in Statement of Profit and Loss on disposal of that financial asset.

Impairment of financial assets

The Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the financial assets and credit risk exposure. The Company assesses on a forward looking basis the expected credit losses associated with its receivables based on historical trends and past experience.

The Company follows 'Simplified Approach' for recognition of impairment loss allowance on all trade receivables or contractual receivables. Under the simplified approach the Company does not track changes in credit risk, but it recognises impairment loss all at once based on lifetime ECLs at each reporting date, right from its initial recognition. If credit risk has not increased significantly, 12 month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used.

ECL is the difference between all contracted cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive, discounted at the original EIR. ECL impairment loss allowance (or reversal) recognised during the period is recognised as income / (expense) in the Statement of Profit and Loss.

B) Financial Liabilities

Financial liabilities are classified, at initial recognition as at amortised cost or fair value through profit or loss. The measurement of financial liabilities depends on their classification, as described below:

At amortised cost

This is the category most relevant to the Company. After initial recognition, financial liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

ADANI GAS LIMITED

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31-Mar-2018

At fair value through profit or loss (FVTPL)

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as such. Subsequently, any changes in fair value are recognised in the Statement of Profit and Loss.

Derecognition of Financial Liability

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

C) Derivative Financial Instruments

Initial recognition and subsequent measurement

The Company uses derivative financial instruments such as forward and options currency contracts to hedge its foreign currency risks. Such derivative financial instruments are initially recognised and subsequently measured at fair value through profit or loss (FVTPL). Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivative financial instrument are recognised in the Statement of Profit and Loss and reported with foreign exchange gains/(loss) not within results from operating activities. Changes in fair value and gains/(losses) on settlement of foreign currency derivative financial instruments relating to borrowings, which have not been designated as hedge are recorded as finance expense.

D) FOREIGN CURRENCY TRANSACTIONS

i) Functional and presentation

The financial statements are presented in Indian Rupee (INR), which is entity's functional and presentation currency.

ii) Transactions and Balances

Foreign currency transactions are translated into the functional currency, for initial recognition, using the exchange rates at the dates of the transactions.

All foreign currency denominated monetary assets and liabilities are translated at the exchange rates on the reporting date.

Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

E) EMPLOYEE BENEFITS

Employee benefits includes gratuity, compensated absences, contribution to provident fund, employees' state insurance and superannuation fund.

A) Short term Employee Benefits

A liability is recognised for benefits accruing to employees in respect of salaries and wages at the undiscounted amount of the benefits expected to be paid wholly within twelve months of rendering the service.

B) Post Employment Benefits

i) Defined Benefit Plans

The Company operates a defined benefit gratuity plan in India, which requires contributions to be made to a separately administered fund. The cost of providing benefits under the defined benefit plan is determined based on actuarial valuation, carried out by an independent actuary, using the projected unit credit method. The liability for gratuity is funded annually to a gratuity fund maintained with the Life Insurance Corporation of India.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling (excluding net interest) and the return on plan assets (excluding net interest), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods. Net interest is calculated by applying the discount rate to the net balance of defined benefit liability or asset.

The Company recognises the following changes in the net defined benefit obligation as an expense in the Standalone Financial statement of profit and loss in the line item 'Employee Benefits Expense':

> Service cost including current service cost, past service cost, gains and losses on curtailments and non-routine settlements; and
> Net interest expense or income

For the purpose of presentation of defined benefit plans, the allocation between short term and long term provisions has been made as determined by an actuary.

ii) Defined Contribution Plans

Retirement benefits in the form of provident fund and superannuation fund are defined contribution schemes. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid.

iii) Other Long-term employee benefits

Other long term employee benefits comprise of compensated absences/saves. The Company allocates accumulated leaves between short term and long term liability based on actuarial valuation as at the end of the period. The actuarial valuation is done as per projected unit credit method.

iv) The Company presents the entire leave as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for twelve month after the reporting date.

a) BORROWING COSTS

Borrowing costs that are attributable to the acquisition or construction of qualifying assets are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for intended use. All other borrowing costs are charged to revenue.

b) SEGMENT REPORTING

Operating segments are reported in a manner consistent with the internal reporting to management. For management purposes, the Company is organised into business units based on its products and services.

The Company has a single operating segment that is "Sale of Natural Gas". Accordingly, the segment revenue, segment results, segment assets and segment liabilities are reflected in the financial statements themselves as at and for the financial year ended March 31, 2018.

c) RELATED PARTY TRANSACTIONS

Disclosure of transactions with Related Parties, as required by Ind AS 24 "Related Party Disclosures" has been set out in a separate note. Related parties as defined under clause 9 of the Ind AS 24 have been identified on the basis of representations made by the management and information available with the Company.

d) LEASES

i) The determination of whether an arrangement is / or contains a lease is based on the substance of the arrangement at the inception of the lease. A lease is classified at the inception date as a finance lease or an operating lease. Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

ii) Lease arrangement where risk and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as Operating Leases. The Company's leasing arrangements are in respect of operating lease for office premises. The aggregate lease rent payable is charged as rent including lease rentals.

e) EARNING PER SHARE

Basic EPS has been computed by dividing the profit for the year available to attributable to equity holders of the parent by the weighted average number of equity shares outstanding during the accounting year. Diluted EPS has been computed by dividing the profit attributable to equity holders of the parent (after adjusting for costs associated with dilutive potential equity shares) by the weighted average number of equity shares and dilutive potential equity shares outstanding during the accounting year.

f) TAXES ON INCOME

g) DEFERRED TAXATION

Deferred tax is provided using the balance sheet approach on temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements at the reporting date.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

Net outstanding balance in Deferred Tax account is recognized as deferred tax liability/asset. The deferred tax account is used solely for reversing timing difference as and when crystallized.

h) CURRENT TAXATION

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date when the Company operates and generates taxable income.

Current tax items, relating to items recognised outside the statement of profit and loss, are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. Provision for current tax is recognised based on the estimated tax liability computed after taking credit for allowances and exemption in accordance with the Income Tax Act, 1961.

Current tax assets and liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

ADANI GAS LIMITED

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31-Mar-2018

b) IMPAIRMENT OF TANGIBLE AND INTANGIBLE ASSETS

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the statement of profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

v) PROVISIONS, CONTINGENT LIABILITIES & CONTINGENT ASSETS

Provisions involving substantial degree of estimation in measurement are recognised when there is a present obligation as a result of past events and it is possible that there will be an outflow of resources. Contingent liabilities are not recognised but are disclosed in the notes. Contingent assets are not recognised in the financial statements. The nature of such assets and an estimate of its financial effect are disclosed in notes to the financial statements.

v) EXCEPTIONAL ITEMS

Exceptional items are generally non-recurring items of income and expense within profit or loss from ordinary activities, which are of such size, nature or incidence that their disclosure is relevant to explain the performance of the Company for the year.

Note : 37 FINANCIAL INSTRUMENTS AND RISK REVIEW

a) Accounting Classification and Fair Value Hierarchy

Financial Assets and Liabilities

The Company's principal financial assets include loans and trade receivables, cash and cash equivalents and other receivables. The Company's principal financial liabilities comprise of borrowings, provisions, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations and projects.

Fair Value Hierarchy

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Level-1 : Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level-2 : Inputs are other than quoted prices included within Level-1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level-3 : Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on the assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

The following tables summarises carrying amounts of financial instruments by their categories and their levels in fair value hierarchy for each year and presented.

INTERNAL RISK FACTORS

1. AGL's future growth of revenue & operations are dependent upon successful bid for new projects under the competitive bidding route.
2. Risks to favorable Gas supply at competitive price
 - a) **Domestic gas:** Currently, city gas is allotted inexpensive domestic gas for domestic and transport segment at administered price. Domestic APM gas production may decline. Going ahead, increase in domestic production is likely to be led by output from difficult fields and from blocks awarded in subsequent auctions, which will command market pricing. A cut back in domestic city gas allocation or allocation of the more expensive domestic gas can impact profitability.
 - b) **Change in domestic gas allocation:** Domestic city gas is currently accorded top priority for domestic gas allocation which is at discount to imported LNG. Subsequent change in the allocation with city gas moving down the priority will increase reliance on expensive imports impacting profits.
3. Risks due to competitiveness of alternatives
 - a) **Low oil prices:** Low oil price improves economics of oil-based alternate fuels which compete with gas. However, cost of imported LNG (contracted and spot volumes), move

with a lag to oil offsetting some of the disadvantages. In the long run, we expect FO supply to tighten as Indian refineries upgrade their facilities limiting FO output which will establish a floor to FO price.

- b) **Sharp uptick in LNG prices:** A drastic rationalizing of upcoming LNG capacities and future capex, a sudden uptick in gas demand may trigger a rally in LNG price impacting Industrial and Commercial segment demand. In addition, the new RasGas formula will immediately reflect on oil price recovery which will increase costs.
4. **Risk to quasi-monopoly:** Entry of new players post the end of marketing exclusivity of 5 years could pave the way for new entrants.
 5. **Regulatory risks:** The Supreme Court had ruled that marketing margins cannot be regulated by the PNGRB. While this has removed a significant overhang, similar regulatory interferences will adversely impact the sector.
 7. **Other risks:**
 - a) Industrial slowdown: Slowdown will impact volumes off take.
 - b) Project risks: Time and cost overruns during project implementation.

RATIONALE AND BENEFITS OF THE COMPOSITE SCHEME OF ARRANGEMENT

- (i) The amalgamation of AGHL with AGL is proposed for simplification of the holding structure resulting in reduction of managerial overlaps and reduction in multiplicity of legal and regulatory compliances.
- (ii) Further, considering the following factors, it is desired to segregate Gas Sourcing and Distribution Business from other businesses of AEL.
 - (a) Each of the varied businesses being carried on by AEL either by itself or through its subsidiaries or through associate companies including Gas Sourcing and Distribution Business have significant potential for growth and profitability. In order to lend greater/enhanced focus to the operation of the said businesses, it is proposed to re-organize and segregate the Gas Sourcing and Distribution Business by way of demerger and transfer the same to AGL.
 - (b) The segregation would enable greater/enhanced focus of the management in the Gas Sourcing and Distribution Business and other businesses whereby facilitating the management to efficiently exploit opportunities for each of the said businesses.
 - (c) The proposed re-organisation will create enhanced value for shareholders and allow a focused strategy and specialization for sustained growth, which would be in the best interest of all the stakeholders and the persons connected with the aforesaid companies.
